Homeopathic Case Histories

Basal Cell Carcinoma - 75 year old woman

A good friend of my wife suffered from a form of recurring cancer known as basal cell carcinoma, a skin cancer, that recurred weekly requiring minor surgery for removal each time. She asked my wife if there was anything homeopathy could do for her. There was. She was given several remedies to be taken in weekly intervals. There was one dose each of *Arsenicum album* 200, one dose of *Kali sulphur* 12X, *Hoang nan* SOX, *Phosphorous* 200, and *Alumen* SOX. She took the *Arsenicum Album* 200, but lost the other remedies. She did not mention it to us for five months, because her cancer did not recur for that long.⁹

Family cancer deaths

I have had two cancer deaths among my siblings and as a result, I am conscious about cancer and try to keep abreast on treatments and cures. Both my brother and sister, as well as my brother's wife died of cancer before we discovered homeopathy. My sister-in-law and sister both choose not to receive treatment other than for pain, as both cancers were considered terminal when they were diagnosed.

My sister's cancer was principally involved with her liver, but was metastatic from her colon. Ultimately, it was cancer of the esophagus that was attributed to her death. However, when it was first discovered, the liver involvement was the problem. After examining her, she was told by her physician that she had either liver cancer, sclerosis, or fatty liver. He went on to tell her that there was absolutely no treatment for fatty liver. Even the sclerosis was deadlier, according to him, than the liver cancer. Nonetheless, when the final diagnosis was liver cancer he pronounced it incurable. Had we known then what we know today, I would have recommended that she alternate taking *Cholesterinum* 3X and *Iodoform* 3X in frequent doses. We would probably have also given her *Arsenicum album* in high potency and *Carcinosin* SOX. With what we know today, I am confident she could have been cured with homeopathy.

My sister-in-law's cancer originated in the breast. She had a phobia of doctors and stayed away until the disease became unbearable. Had she consulted with her doctor when she first discovered the lumps in her breast she might have been successfully treated (*by allopathic or*

⁹Since the 200th dilution certainly doesn't contain any of the original substance, I'm sure the detractors would say this was a placebo cancer cure, but we find this just too convenient as a catch-all explanation for those people who want to condemn homeopathy without trying it.

surgical measures). Both schools have a great deal to offer breast cancer patients when the detection is early. Homeopathy also has a great deal to offer for women suffering from breast cancer, often obviating the need for the disfiguring surgery, by prevention or non-invasive curative treatment.

My brother's cancer, asbestosis, was also considered terminal when diagnosed, but he pursued treatment including x-ray therapy, chemotherapy, and even laetrile. A friend of mine who is a radiologist had told me privately, that my brother should avoid the therapy since it was worse than the cancer. His advice proved to be true. My brother was an ex-boxer in the 180 pound class before the cancer and at his death, about a year after he was diagnosed, weighed maybe 60 pounds.

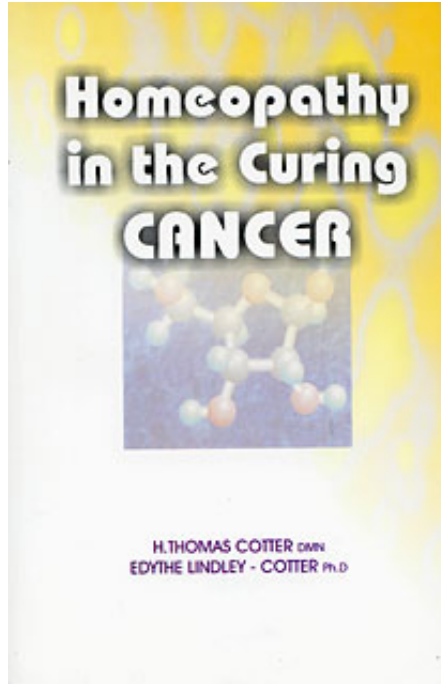

It was shortly after his death that we discovered homeopathy, but even today, we might have been able to do nothing to change the ultimate course of the disease, since even masters of homeopathy have died of cancer. Nevertheless, we did discover that a group of physicians in Los Angeles had been experimenting with asbestos in potency as a treatment for this particularly dreaded cancer. These were the type of cancer cells that killed the movie actor Steve McQueen, so if conventional treatment could defeat it, we suspect with his wealth and fame, Mr. McQueen would have found it.¹⁰

Cancer death of a psychologist friend

We had another friend who died of cancer (*leukemia*) about a year after we began studying homeopathy. He was a psychologist who lived near Los Angeles, and was far along in the disease when it was discovered. While we did not yet have the skills to treat him, we urged him to consult with a homeopathic physician and lined up several potential appointments for him. He chose instead to try various herbal cures, and died out of the country at one center purporting to have a cure for his cancer. While he did not get homeopathic treatment for his cancer, per se, he did use *Ignatia* in 6X and later in SOX for the worry the disease was causing him and reported to us, that it got rid of the worry and dread and allowed him to start sleeping again.

With what we know today, we would have recommended *Benzenum* made from coal naphtha which in provings resulted in a *decrease of the red and increase of white cells*. Remember, homeopathic doses *reverse* what a drug causes in material doses. Also — two very similar diseases cannot co-exist in a living organism. One, even when medically induced, cancels out the other.

¹⁰We have been unable to get additional information on the results of the homeopathically prepared asbestos from the doctors in Los Angeles.
